

ForenSight Forensic Triage Report

1. Case Information

Case ID	CASE001
Examiner	Team9
Report generated (UTC)	2026-07-21T23:15:33.399330+00:00
Tool	ForenSight v1 (rule-based triage framework)

Executive Summary

12 artifact(s) were examined; 4 flagged High priority; 4 type mismatch(es) detected; 1 hidden file(s); 1 file change(s) detected since acquisition.

2. Chain of Custody

Date	2026-07-21 23:15:32 UTC
Received/Seized from	synthetic_evidence
Received/Seized by	Team9
Reason obtained	Digital forensic triage and analysis
Location from where obtained	...forensight_aplus/synthetic_evidence
Description of evidence	12 file(s); 4 high-priority; 4 type mismatches

EvidenceFileSystemUsersInfo	-
EvidenceFileWriteBlockMethod	Logical read-only access (files opened read-only; evidence not modified)
EvidenceFileEncryption	-
EvidenceFileFileSystem	ext4

EvidenceFileOSVersion	-
EvidenceFilePartitionsInfo	-

4. Examination Tools & Method

Files were ingested and hashed (SHA-256), typed by content (libmagic) and compared against their extension, checked for anti-forensic indicators (hidden, double-extension, timestamp anomalies, high entropy), then scored by a transparent rule-based engine (Integrity, Relevance and DFI scores). Integrity was preserved via per-file hashing and a case-level evidence seal.

5. Findings - Triage Summary

Appendix B. Scope & Supported Input Formats

ForenSight performs **disk / file-system and file-media triage** for high-volume digital evidence. Memory (RAM), network (pcap), mobile and cloud forensics are out of scope by design and are noted as future work.
